

Jet Runners

Powerful twin engine push boats. Easily transportable by road with shallow draft. 6 available.

Vessel Information

Vessel Name	Jet Runner 1/2/3/4/5/6
Vessel Type	Powerful push tug/Workboat
Coding	MCA coding to order C&RT Registered Workboat
Vessel Capacity	2 Crew + 6 Passengers

Twin engines and directional water jet propulsion/steering allow for supreme manoeuvrability in all directions. One or more boats can be made into a composite unit with a barge or pontoon, pushing up to 200 tonnes. The robust construction and shallow draft makes these craft equally effective in deep and shallow water. Each craft can be lifted by Hiab and transported by road.

Vessel Specification

Manufacturer	FBM Marine Group
Hull Material	Aluminium Alloy
LOA	8.38m
Beam	2.49m
Draft Loaded	0.66m
Bollard Pull	2 tons (approximate)
Machinery	2 x Sabre 212 turbo diesel 2 x Ultra two stage water jets with steerable nozzles and reversing buckets
Displacement (lightship)	4000kg
Maximum payload	2000kg
Fuel capacity	270 litres

Technical Specification

Systems & Welfare	Eberspacher heating
	Bilge pumps
	Navigation lights
	Search light
	LED work lights/floodlights
Deck Fittings	Forward pushing knees
	Aft Capstan winch
	Removable cab if required for air draft
	Enclosed cab for foul weather
